

Set up FORMED Pick of the Week iFrame Embed

Automatically display Pick of the Week on your web site.
Follow these step-by-step instructions.

Step by Step Directions

1

Open your website editor

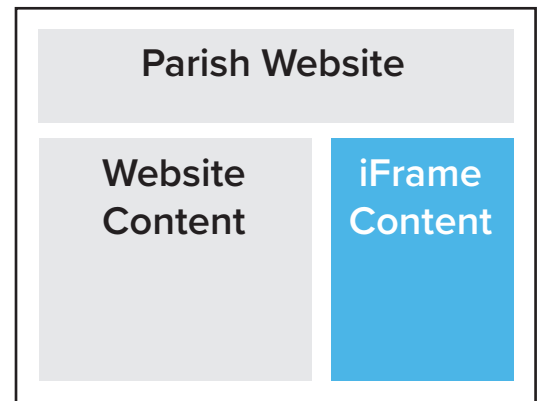

- iFrames are compatible with any website tool, such as WordPress, Joomla, eCatholic or straight HTML.

2

Designate the space for you iFrame

- Open the page or sidebar you want to add the iFrame to and designate the best area to display the iFrame content.

3

Paste the iFrame code

- Copy the iFrame code: `<iframe src="https://leaders.formed.org/files/potw-vert.html" width="100%" height="800">`
- Be sure your are in your editor's "code view" then paste the embed code.
- The height assumes you will be placing the iFrame at a width of approximately 320 pixels. If you place the iFrame into a narrower space, you'll need to increase the height (otherwise it will display with a scroll bar). If you place it in a wider space, you can decrease the height.
